DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 18, 2003 has been entered.

2. This Office action is in response to Applicant's amendment filed July 18, 2003. Applicant has amended claims 1-5, 8-9, 13 and 15. Claim 17 has been canceled. Currently, claims 1-16 and 18-19 remain pending in the application.

3. The text of those sections of Title 35 U.S. Code not included in this action can be found in the prior Office actions, Paper Nos. 7 and 9.

Priority

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Art Unit: 1751

5. The objection of the specification for containing the trademark OptigelTM WX on page 5, line 7 is withdrawn in view of applicant's amendments and remarks.

6. The rejection of claims 1-19 under 35 U.S.C. 112, second paragraph, is withdrawn in view of applicant's amendments and remarks.

7. The rejection of claims 1-19 under 35 U.S.C. 102(b) as being anticipated by Massaux et al, U.S. Patent No. 5,849,105, is maintained for the reasons of record.

Response to Arguments

8. Applicant's arguments filed July 18, 2003 have been fully considered but they are not persuasive.

Applicant argues that the instant invention is a thickened abrasive formulation, whereas the composition disclosed by Massaux et al does not teach or suggest a thickening agent in their composition. However, the examiner respectfully asserts that Massaux et al does indeed teach a thickening agent in their composition. Specifically, Massaux et al discloses that to promote uniformity in the composition that a polycarboxylate thickener is added to the premix of the composition (see col. 10, lines 1-14), per the requirements of the instant invention.
